

De Sakekaart van restaurant Roji

Sake is de ultieme begeleider voor de Japanse keuken. Het is een pure drank zonder sulfiet die zich perfect aanpast aan gerechten. Afhankelijk van hoe sake gemaakt wordt vindt er een indeling plaats in verschillende stijlen en kwaliteitsgroepen. Bij Restaurant ROJI hebben we voor u een mooie selectie gemaakt waarbij we de meest mooie sake's, stijlen en gebieden de revue laten passeren.

Namens de makers.

Wij serveren zowel warme als ook koude sake en specialiteiten. Sake wordt warm, kamertemperatuur of koud geschonken afhankelijk van de structuur van de sake. Sommige sake's kunnen op verschillende temperaturen genuttigd worden, belangrijk is dan het jaargetijde en de combinatie met gerechten.

Kwaliteit sake wordt onderverdeeld in verschillende groepen. Allereerst is er de groep waarbij er een kleine hoeveelheid alcohol is toegevoegd aan het einde van het brouwproces. In tegenstelling tot de bulk en basis sake, waarbij dit extensief gebeurt om de opbrengst te verhogen, vindt dit bij deze groep plaats om sake beter door de lagering te laten komen.

De tweede groep van kwaliteit sake is de zogenaamde Junmai groep. Junmai is Japans voor puur. Bij deze groep is alle alcohol verkregen in de sake ontstaan door vergisting van glucose die voortgekomen is door omzetting van de zetmeel in de rijst.

Voornamelijk gebaseerd op de mate van het polijsten van de rijst worden beide groepen verder geëvalueerd, waarbij men uitgaat van hoe lager het restgewicht na het polijsten, hoe beter de sake is. Dit heeft ermee te maken dat kwaliteit sake gemaakt is van speciale sake-rijst. Deze rijst kent een opbouw waarbij zich in de kern geconcentreerd zetmeel bevindt, aan de buitenkant relatief veel proteïnen en vet. Hoe minder vet en proteïnen vrijkomen in de sake hoe eleganter en verfijnder de sake smaakt, hoe hoger de classificatie.

Het serveren van goede koude sake kan het beste in een wijnglas, speciaal gebrouwen sake heeft namelijk net als wijn een bouquet, daarnaast wordt sake zachter in smaak doordat er in een wijnglas meer lucht bijkomt. Warme sake kan het beste in karafjes met kopjes worden opgediend.
